

Warning! Passport awareness at the airport

I read this post from my cousin's wall in Facebook. Thanks dear cousin for sharing this. I also love travelling and was quite scared after reading this. Thanks God that it really did not happen to me and I hope and pray will never ever happen in the future also. To all travellers out there, please read. This might help you as a precaution when you travel. Just be very careful. Have a safe and sound travel to all of you!

Please be Careful at the Airports, This is a well organized conspiracy by Immigration, Police, Customs and Airline staff with networking at all International Airports. Be careful when ever you give your passport to Immigration/Customs/Airline staff. The passport can be easily tampered and can create trouble to you. They have found an easy way of making money. This is the way it works:

- At the time of the passenger's departure, if the passenger is not looking at the officer while he is stamping the exit, the officer very cleverly tears away one of the pages from the passport. When the passenger leaves the immigration counter, the case is reported on his computer terminal with full details. Now all over the country they have got full details of the passenger with Red Flag flashing on the Passport number entered by the departure immigration officer. They have made their money by doing above.
- On arrival next time, he is interrogated. Subject to the passenger's period of stay abroad, his income and standing etc., the price to get rid of the problem is settled by the Police and Immigration people. If someone argues, his future is spoiled because there are always some innocent fellows who think the honesty is the basis of getting justice.

Please advise every passenger to be careful at the airports. Whenever they hand over the passport to the counters of Airlines or immigration or the customs, they must be vigilant, should not remove eyes from the passport even if the officer in front tries to divert their attention.

Also, please pass this information to all friends, media men and important politicians. Every month 20-30 cases are happening all over the world to rob the passenger the minute he lands.

A similar case happened with Aramco's Arifuddin in Pakistan. He was travelling with his family.

They had six passports. They got the [visa for Vietnam](#) and decided to go via Jeddah. When they reached Vietnam, the page of the [Vietnam visa](#) on his wife's passport was missing. At the time of departure from Pakistan it was there, the whole family had to return helplessly. On arrival at Pakistan, they were caught by the police and now it is over 2 months, they are running after the Police, Immigration officers and the Courts. On going in to details with him, he found out the following: One cannot imagine, neither can believe, that the Immigration dept can play such a nasty game to harass the innocent passengers.

All the airlines passengers must be aware of this conspiracy. Every month 15 to 20 cases are taking place, at each mentioned airport, of holding the passengers in the

crime of tearing away the passport pages. On interviewing some of them, none of them was aware of what had happened. They don't know why, when and who tore away the page from the middle of the passport. One can imagine the sufferings of such people at the hands of the immigration, police and the court procedures after that. The number of cases has increased in the last 2-3 years. People who are arriving at the immigration, they are questioned and their passports are being held and they have to go in for detailed interrogation. Obviously, the conspiracy started about 2 to 3 years ago, now the results are coming. Some of the Airline counter staff too is involved in this conspiracy.

So make sure not to let the passport go off your sight even for a second. The immigration counters are high and tired and short passengers really have to work hard to keep the passport in sight, specially after the exhausting journey, everyone wants to get over with the airport formalities and go home. So being vigilant for an extra minute will save you a life time of misery. Best of luck in your travels.

Kindly send this to as many of your intending travellers and friends across the world request them to check the passport at the checking counters and before leaving the airport.

I think at least have a full photo copy of passport and keep scan of your passport in your hard drive or flash memory and i will advise same for ticket also.
